-Recycle pickup is performed for residents who use Republic Services for their garbage pickup. If you have questions, please call us at 574-892-5717. Recycle pickup is every other week. Please have your recycle tote out to the street by 5 a.m. on your scheduled pickup day.-- Because this is an automated route, please place your recycle tote approximately 5 feet away from your trash tote so your driver can get to them.-- Recycling must be clean and free of garbage to make this a successful program. Remove staples, paper clips, etc. from paper products. Labels do not need to be removed from bottles and jars. Flatten and break down everything as much as possible (except glass, of course). Rinse food containers (they don't need to be spotless). Remove metal lids from glass jars and recycle both. Plastic lids can stay on plastic bottles.-- All items need to be of a size to fit into the tote. If you have more than will fit into the tote, place these items in bags next to the tote so the driver can reload them into the tote for pickup.

**Accepted Recyclable Materials**

**Metal** - cans (flatten if possible), aluminum, tin, steel, and bi-metal food and beverage containers.

**Plastic** - containers (flatten if possible) - PET (#1) - Soft drink bottles and HDPE (#2) - milk jugs, detergent bottles, and #3 through #5 plastics. Look for the triangle, usually on the bottom of products, with the 1 through 5 inside to know these are acceptable items.

**Glass** - containers (unbroken) - clear and all colors of food and beverage containers.

**Paper products** (break down or flatten if possible) - Newspaper & slick inserts, junk mail, magazines, catalogs, phone books, cardboard, paperboard (cereal and tissue boxes), post-it notes, all carbonless office, computer, and fax paper, construction paper, softback book, and hardback books as long as the cover is removed.

**Common items NOT ACCEPTED**

Wax coated paper or wax coated cardboard (ice cream or milk cartons), carbon paper, engine oil bottles, paper with food or other residue, tissue paper, paper towel, wood, construction or demolition materials, electronics, broken glass, window glass, pyrex, light bulbs, drinking glasses, plates and dishes, batteries, tires, egg cartons, and food wrappings.
